

About

Pacific Software, Inc. (OTC: PFSF) is an enterprise designer, operator, developer and licensor of transactional solutions for most industries. It is postured for investments, mergers, acquisitions and business combinations for emerging technologies and digital platforms. The company operates its current project, BOAPIN.com a multi-faceted commodities trading portal.

Our Focus

Manage the business affairs of BOAPIN.com the multifaceted commodities trading platform that may improve product tracking and deliver a variety of tools and trading solutions to its fee based registered subscribers. The platform is targeting cross border trade expansion initially between Brazil and China where its online applications and competitive pricing solutions may be utilized in various forms in several key industries including: Agriculture, Fertilizers, Wines and Spirits, Chemicals, Cosmetics, Electronics, Equipment, and Apparel.

BOAPIN - Intelligent Trade Platform

BOAPIN is a technology platform uniquely positioned to deliver B2B solutions for the import/export trade sector by deploying cutting-edge technologies such as artificial intelligence (AI), big data analytics, smart contract and blockchain technology. Our platform aims to shorten the trade cycle, increase trade efficiencies and grow global trade. Designed as an open-architecture platform, BOAPIN will build an ecosystem which digitalizes the trade process.
